Matter is the material from which everything is made. Matter takes up space and has weight. There are three states of matter: solid, liquid, and gas. **Solids** keep their shape and can be seen. **Liquids** take the shape of their container, can flow, and can usually be seen. **Gases** take the shape of their container and are often invisible.

Ice is matter in a solid state. Water is matter in a liquid state. Water vapor, or steam, is matter in a gaseous state.

Study the pictures and descriptions on this page. Write the name of each picture under the correct heading on the chart. Think of additional substances to complete the chart.

Solids	Liquids	Gases

Challenge! Try to think of ways that solids, liquids, and gases are useful to us. How can they be harmful? List your ideas.

Name: _____

Goods and Services

A **good** is something you buy and consume. Goods are things that you can keep, eat, or use.

If you go to the store and buy an apple, you get to keep the apple and take it home with you, so it is a good.

A **service** is something that someone does for you. When you buy a service, you hire people to perform work. You are not buying something you can touch or hold.

If your car is broken, you might hire someone to fix it. You are paying for a service.

Read each scenario and tell whether you are purchasing goods or a service. Write the word **good** or **service** on each line.

1. You get your hair cut. 1. _____
2. You buy a book from a garage sale. 2. _____
