

Gary Marshall just graduated from Madison High School. He was an average student who enjoyed hands on classes like computers more than core academics like history, english, and math. His favorite pastimes are baseball (he played on the high school baseball team for four years) and playing computer games on the internet. He had several part-time jobs during high school including:

- Delivering pizzas
- Clerking in a computer store in the mall
- Stocking shelves at Wal-Mart
- Working in a lumber yard
- Selling movie tickets at the local multiplex

Gary is not interested in going on to school. He just wants to go to work full-time. He also knows he wants to stay in Madison, but move out of his parents house as soon as possible and live on his own.

Listed on page 5 are several ads from the Help Wanted section of the Madison newspaper. Rank from 1-10 the jobs you think he should apply for with 1 being your first choice. Explain why you chose each of the ten.
